

balder tech

The home of  balder powerchairs

WELCOME TO baldertech

Where customer care, comfort, quality and versatility is at the heart of what we do!

Since 2019 Baldertech has been the supplier and manufacturer of Balder powerchairs to the UK market, operating from our Basingstoke headquarters in southern England. We work seamlessly with our Norwegian manufacturing facility to produce you a Balder chair which will support you for years to come.

Our range of powerchairs are amongst the most advanced in the world, on a compact and manoeuvrable chassis that allows you to live your life without limits, indoors or out. In a choice of front or rear-wheel drive, we offer a wide variety of seat functions, from standing to reclining flat, and accessories to suit every need.

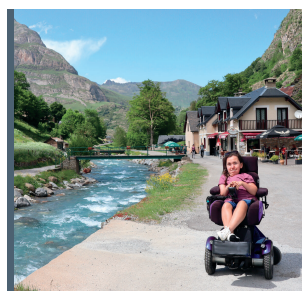

We believe you deserve the very best, and that's just what you'll get with Baldertech!

INSPIRED BY YOU

After years of listening and being inspired by people like you, we've developed and produced a range of powerchairs which represent the very best in quality, manoeuvrability and flexibility. They act as a perfect platform for us to add bespoke options to enable you to have your perfect powerchair solution.

We understand that everyone is unique, and believe that your powerchair should be too!

HANDMADE IN NORWAY – BY US!

Balder powerchairs are handmade by our dedicated and highly skilled factory team in Hønefoss, Norway, before being sent out to customers globally. Their timeless, reliable and robust design is renowned across the world and has been developed and produced for over 30 years.

ASSESSMENTS

When it comes to powerchairs, it's vital to get it right. That's why we offer free, no-obligation assessments across the UK!

Supported by our decades of experience in the powered wheelchair market, you'll be sure to receive a chair which is right for you and will be able to support your ongoing needs if things change.

We will meet you at a time and place that is convenient to you, working alongside your family, physiotherapist and occupational therapist to build you a chair that supports your needs in every way possible.

SERVICING + SUPPORT

Balder powerchairs are renowned for their reliability and longevity – With some 20+ year old chairs still going strong today!

But your contact with us doesn't stop after sale. Ongoing customer support is paramount to us, so our experienced team of engineers will be on hand for servicing and support throughout the life of your Balder.

FINESSE F380

The Balder Finesse 380 powerchair is one of our most popular models, featuring countless bespoke options which enable us to build one to your exact needs. The F380 has such a wide range of movement that sitting comfortably at a table or desk, reaching high and low or relaxing in comfort are no longer an aspiration but an every day reality.

When you sit in a Finesse, the first thing you will notice is how remarkably comfortable it is due to the seats ergonomic design and high quality upholstery. This combined with the fully

adjustable seat, back, foot rests and leg supports gives you a chair that does everything possible to reduce friction and relieve pressure.

Featuring 5 powered seat functions as standard, including an impressive 'tilt-in-space' movement that allows you to tilt back by up to 45° and forward by 15° whilst remaining in the same seated position. Furthermore, its ability to lay you completely flat with variable seat height functions make it one of the most versatile powerchairs available.

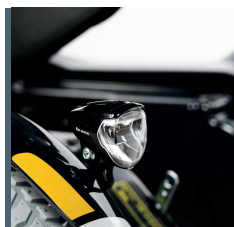

Achieve more with Finesse

BALDER LUX PACK

LUX by name, luxury by nature!

All Balder powerchairs come with the option to be upgraded to LUX, which includes some of our most popular options in a cost effective bundle and is designed to add convenience and ease to your everyday life.

- 10Kph Motors
- USB Charging Ports
- LED Lights
- Gyro Drive Technology
- Black Tyres
- REM400 Touchscreen Joystick
- Custom Paint Job

LUX

FINESSE F390

Rising above all other powerchairs, the F390 takes you from sitting or lying to an upright position with a stop/start movement that you control. With a supporting chest strap and knee brace to give total security and comfort, you can even drive safely in a standing position, confident that you will remain stable.

When the F390 begins to move to a standing position, the supporting castors will automatically power down when the surface is level. If the surface is uneven, the F390 will not continue, which ensures you only stand when it is safe to do so. When you are ready to resume a seated position, at the touch of a button the F390 will retract to a

pre-programmed position of your choice.

As well as enabling you to stand, the F390 features the same array of powered seat functions and comfort as our Finesse 380 giving you a greater range of positions to make everyday life so much easier.

Following your personal assessment you will realise just how adaptable Balder powerchairs really are. As well as having the F390 designed to your individual specification, you can also choose from an optional range of colours, seat fabrics and accessories to create a Balder that is completely unique to you.

Stand with Finesse

- Flip-up arm rests
- Up to 40 km range
- Unrivalled longevity
- UK held parts stock
- Puncture proof tyres
- Choice of input controls
- Chin/head control
- Specialist seating

SAFETY AS STANDARD

At Baldertech we produce some of the most advanced powerchairs available today, but also some of the safest, with this being at the forefront of our design process. All Balder chairs have passed crash-testing before being produced for our customers, to ensure that you can live your life as safe as possible.

We've also designed a perfect solution to travelling in a vehicle - the crash-tested Balder Automatic Tie-down System. Unique to Finesse and Liberty powerchairs, this system uses the power of the chair to operate a securing mechanism, locking it onto an anchor point on the floor of the vehicle. This anchor point is easy to install and does not need any

additional electrics or wiring.

Switching back to the original vehicle seat is no problem, as all you need is a Balder Undercarriage System and the seat can be easily refitted.

One unique aspect of Balder powerchairs is that along with our own docking system, we've also crash tested the Balder for use with the QLK system from Qstraint and the DAHL Docking station. This harmonised approach give users a greater choice of system and saves having to further adapt a vehicle if you already have one system in place.

Crash Tested

JUNIOR J335

Childhood years are so important – A time when your child begins to make decisions on their own and starts to discover who they really are. The Balder Junior 335 is a powerchair that will grow with your child, giving more independence and providing greater confidence when facing new challenges.

With all the benefits of our adult chairs, the J335 will allow your child to experience more both indoors and out. What makes our Junior chair so special

is the range of different positions it can assume. In the J335 your child can sit as high as 0.8m or as low as 0.35m from the ground. They can also lie flat, tilt back by up to 45° and forward by 15°, making many more activities possible.

The J335's seat, back, foot rests and leg rests are adjusted independently, so you can make your child as comfortable as possible in any position.

Built to last and grow with you, our Junior chairs seat and leg rests can be adjusted, so as your child grows, the seat will too.

Grow with Balder

standing wheelchair

From fun in the park to trips to the zoo, a child's life is all about new and stimulating experiences. Being able to play happily and enjoy the company of other children is incredibly important and this has inspired Baldertech to design a very special powerchair – the Balder Junior 340.

The J340 is much the same as our Balder J335, but with the added function allowing you to stand. When the J340 begins to move to an upright position, the supporting castors will automatically lower when the surface is level, enabling your child to move safely while standing. The 340 Junior will also raise and lower your child as they sit or lie, so they can reach up higher or down closer to the ground. In addition, they can tilt forward and back into positions that make them more comfortable as they play, relax and work.

JUNIOR J340

LIBERTY L380

Experience something different with the Balder Liberty 380. Hand built to the high standards you'd expect from Baldertech, the Liberty answers the need for people who prefer the difference of a rear wheel drive powerchair.

Using the same high quality components as our Balder Finesse powerchairs, the Liberty has been engineered to a rear wheel drive configuration. Available in both an adult and junior (J335) arrangement, the Liberty is a highly adaptable powerchair with countless options which enable us to build one completely bespoke to you.

Above its chassis the L380 features the same array of seat functions as the rest of the Balder chair line up, and includes 5 powered seat functions as standard, which include the tilt-in-space movement, lay flat and variable seat height.

With an impressive range of up to 40 km, the Liberty will keep you on the move all day long. As with every Balder powerchair, you can personalise your Liberty with a choice of seating systems and fabrics, including your very own choice of chassis cover colour. We also have a wide range of accessories which include, powerful LED lights for extra safety in the dark and handy bag hooks for carrying a rucksack. During your personalised assessment with the Balder Liberty we will go through all the various options with you and ensure it is the right chair for you.

Drive with more

FINESSE FOR LESS?

At Baldertech we understand that your budget may be limited but you do not want to compromise on quality. This is where our Balder base models can help.

Manufactured using components of the highest quality, the Finesse and Liberty 370 have our stamp of engineering excellence. It has the greater range of movement associated with a Finesse powerchair, allowing you to raise and lower your seat. With the

use of a tool you can also manually adjust the seat tilt and the leg rests.

On the move, you have front wheel drive for accurate manoeuvring, made even easier by the chair's slimline shape. And because they're so robust, you can be confident you are in a reliable powerchair. You have the option to add features and accessories whenever you want, so as a base model there is no better choice.
